

CSHP R&E Foundation Benefits from Generous Support of AstraZeneca

The CSHP Research and Education Foundation was the recipient of \$20,000 donated by AstraZeneca to support the Foundation's sponsored research grants and targeted educational programs. During last year's Annual General Meeting in Ottawa, George De Angelis, Director of Hospital Initiatives at AstraZeneca Canada, presented the donation to Linda Poloway, Chairperson of the CSHP Research and Education Foundation.

"AstraZeneca continues to demonstrate exemplary commitment to professional stewardship in funding research conducted by hospital pharmacists and by supporting the new direction of the Foundation to address the unmet educational needs of our members", said Linda Poloway. Each year the Foundation grants approximately \$30,000 to fund pharmacy practice research or research that advances knowledge in the pharmaceutical sciences. Ultimately, the research results in improved care for the public.

The Foundation looks forward to increased partnering with industry to continue to advance pharmacy practice for the benefit of the patient. The Foundation's Board is encouraged by continued support from companies such as AstraZeneca.

George De Angelis, Director, Hospital Initiatives, AstraZeneca Canada, presents a cheque for \$20,000 to the CSHP Research and Education Foundation, represented by Linda Poloway, Chairperson of the Foundation.
